

STABILIZATION OF POLYMERS  
AFTER EXPOSURE TO OXIDATION

Abstract of the Disclosure

Disclosed is polyvinyl chloride, polyvinylidene chloride, polycarbonate,  
5 polyethylene, polypropylene, polyamide, polyimide, polyether, polyester, or polyvinyl acetate containing about 0.005 to about 10 phr of a stabilizer.

Also disclosed is a method of preventing these polymers from discoloring after exposure to oxidation.
